

CORRUPTION PREVENTION CONCEPTS: PROTECT YOURSELF

Australian Government
Australian Commission for
Law Enforcement Integrity

Four ways to help you to protect and maintain your integrity against corruption risk

Be aware rather than beware

Know the risks in your environment. Anticipate situations where someone might attempt to compromise you, and practice your response.

Don't try to manage a situation yourself

It's the organisation's job to know its risks and to decide how they should be dealt with.

Know where to go for help or advice

It's better to act on a suspicion by reporting it, than to allow corrupt conduct to continue unchecked.

Trust the system

Speak to your supervisor or senior manager. Report incidents through the methods available to you within the organisation-or you can talk to ACLEI.
